# New projects status

**Lbcom:** Essentially L0.

**Rec:** Reconstruction software, including `Trg/`.

**Phys:** Physics software, including `Hlt/`.

**Online:** Online **Gaudi**, **GaUCHO**.

- The applications are essentially empty, except for the application package itself (`Phys/DaVinci/v14r0` for instance).
- The four “old” applications and the **Lbcom**, **Rec** and **Phys** are available on `$LHCBDEV`. To be released this week (or early next).
- The **Online**-dependent stuff is under development.
