

LHCb Computing Operations - minutes of the meeting 11th January 2007

Present : Davide Perego, Roberto Santinelli, Nick Brook, Joel Closier, Stuart Paterson.

**Action list:**

1 - Andrew : move data from PIC to SARA

**Simulation :**

running smoothly (more than 6000 jobs running this morning)

Problem with one eventtype. Patrick Robbe informed and a new DecFiles has been produced (v13r6).

This signal will be redone.

Some jobs are in status "job reschedule" but are not rescheduled. This is due to the fact that the job can not download the input sandbox. The problem was during the submission of the job by the repository\_agent which had a SSL error, so half of the information has been put in the JobDB.

Olivier Schneider have been informed that all requests have been submitted

**Reconstruction :**

NO reconstruction jobs running. We restart the reconstruction of b-inclusive with the latest version of Brunel v30r14. in order to use Nikhef, we will move B inclusive at high luminosity from PIC.
