

LHCb Computing Operations

Monday, May 21, 2007

Present : Joel Closier, Andrew Smith, Roberto Santinelli, Marianne Bargiotti, Stuart Paterson, Umberto Marconi, Philippe Charpentier, Daniela Bortolotti, Gianluca Castelli, Cedric Potterat, Raja Nandakumar, Besma M'charek

Excused : Nick Brook, Ricardo Graciani-Diaz

Simulation:

No activity

Reconstruction:

Nobody watch the system last week due to the DIRAC3 workshop.

Summary of the status: no job are running and lot of jobs were in STAGEIN status

1517 at RAL, 136 at GRIDKA, 15 at PIC and 5 at CERN.

Since the 10th of may 800 jobs finished successfully but only 15 since the 14th of May.

No jobs are running because the proxy of Raja is not able to query the LFC. Something change on the LFC server side without any warning... Raja renew his proxy and now jobs are running again.

But why we are able to submit jobs with VOMRS extension which is not valid ?
